About Me

I'm a student at the University of Douala, I'm 22. I'm a full-stack web developer, and I use ReactJS (NextJS) to build frontend applications and Node (Express and NestJS) to build backend applications. My main aim is to build, test, and deploy web apps using JavaScript technologies.

Educational

2018-2019

Makepe High School

It's where i got my bachelor's degree

2021 - present

University of Douala in Cameroon

I study computer science in the university of Douala since 2021 and i'm in level 3 now.

Experiences

2021 - present

Learning period

I started with the frontend development in 2021 with HTML, CSS and Javascript. Then i continue by learning ReactJS and Nodejs/ ExpressJs frameworks. I realized some small projects during my learning period.

Internship

In the months of June and July 2023, I did some academic internships at Ova-Consulting, where I learned enough to work in a team using things like Slack and Trello.

2022

Food Selling App

It's plate-form which can help to sell food (Pizza), users can add products to their card and order it.

link : <https://food-selling-app.vercel.app>

Tetris Game

From August 2022 to Jan 2023 , with the help of many online tutorials and people, I was able to create a nice tetris game with Reactjs only.

link: <https://react-tetris-three.vercel.app/>

Note-taking app

In the month of November 2022, i built an application that can help people store their notes, modify them, and delete them. They can also search them by tags. I used ReactJS and Typescript to build it.

Link over here: <https://note-taking-app-phi.vercel.app/>

Chat application

During the last week of 2022, I start building an application with NodeJS and socket.io where someone can send messages and images to a group of person in a specific room in real time.

The link : <https://chat-app-cucz.onrender.com/>

2023

Invoice Generator

From February 2023 to May 2023, I built an application to generate invoices and send them to someone by email. I use ReactJS, NodeJS (Express), and Nodemailer to do that.

Link to the project: <https://github.com/ivan01-tech/invoice-generator>

Nested comments system

I also built a blog with a system of comments like Reddit where someone can add, update, and delete their comments, and also reply and like other comments in an infinite way. I did it by using ReactJS, Node (Express), Prisma, and Tailwind CSS.
